

**Frame extension AW 917
to create
70mm x 42mm frame
from 53mm x 33mm
outer frame**

The advantage of the AW 917 frame extension is that the top and bottom outer frame height is kept at 33mm so even with a 42mm night vent extension the total height of the frame is 75mm and with a 25mm cill the frame is only 58mm keeping the slim appearance required by the customer.

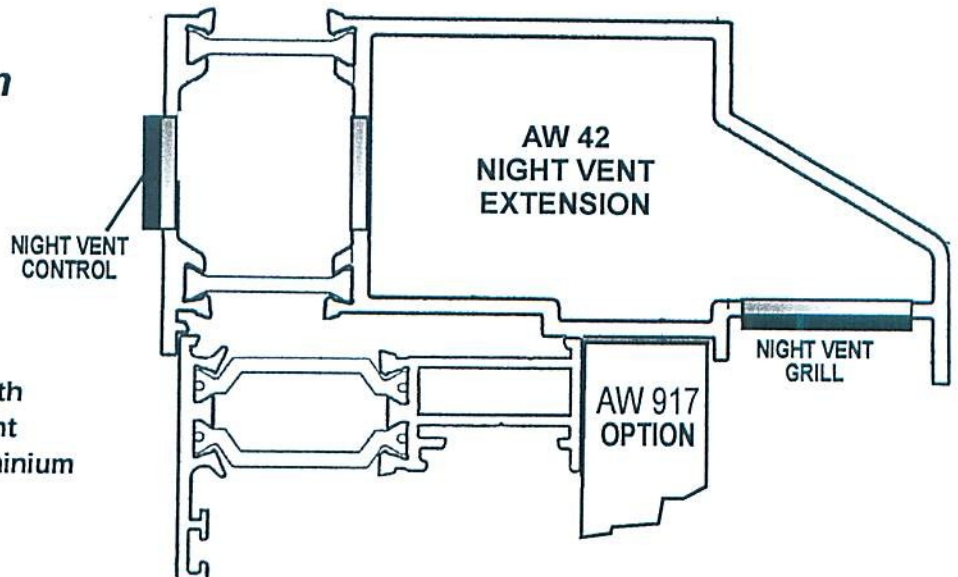

**AW 917 9mm drainage
cill for stone cills**

Many (if not most) aluminium windows fitted into new build are installed onto stone cills - combined with the 33mm frame the AW 917 drainage cill keeps the slim appearance favoured by self builders.

**AW 42 Concealed 42mm
night vent head extension
for aluminium windows
50mm to 70mm
outer frame**

Aluminium windows and doors have the option of Concealed trickle ventilation with integrated head - no visible external night vents to spoil the appearance of slim aluminium windows and bi-fold doors.

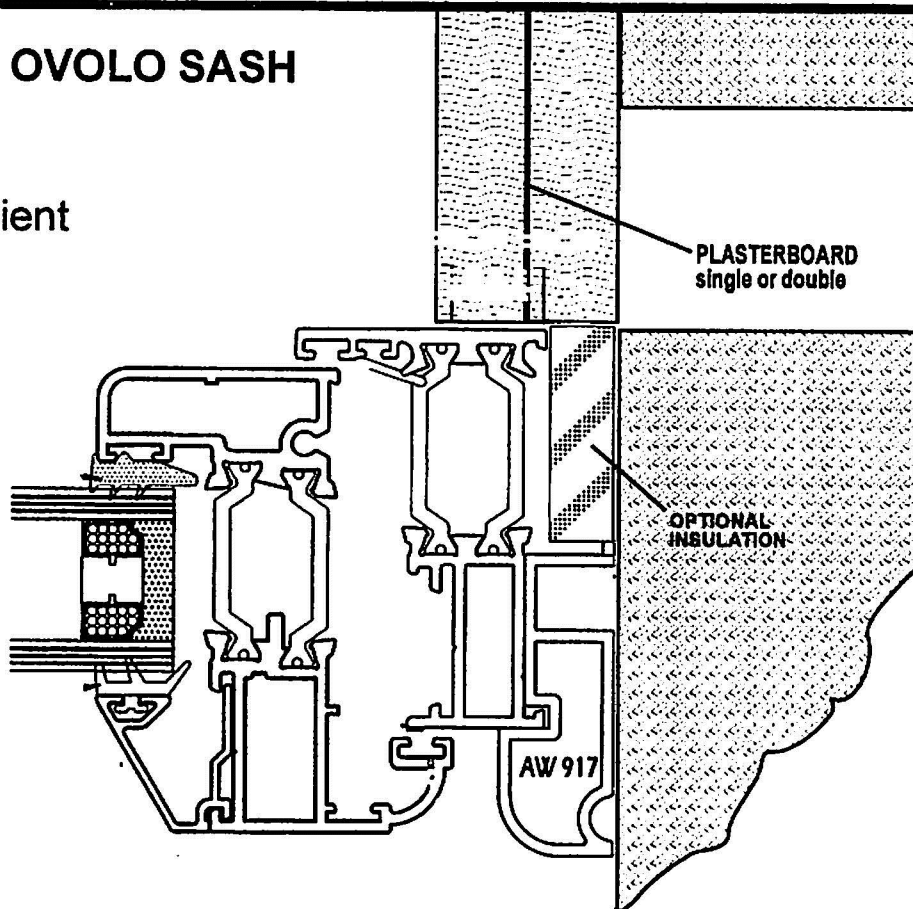

The AW 917 extension can be used to create stylish windows

More householders are choosing Aluminium because of appearance. The Affordable range adds more options to further improve the appearance of finished installations.

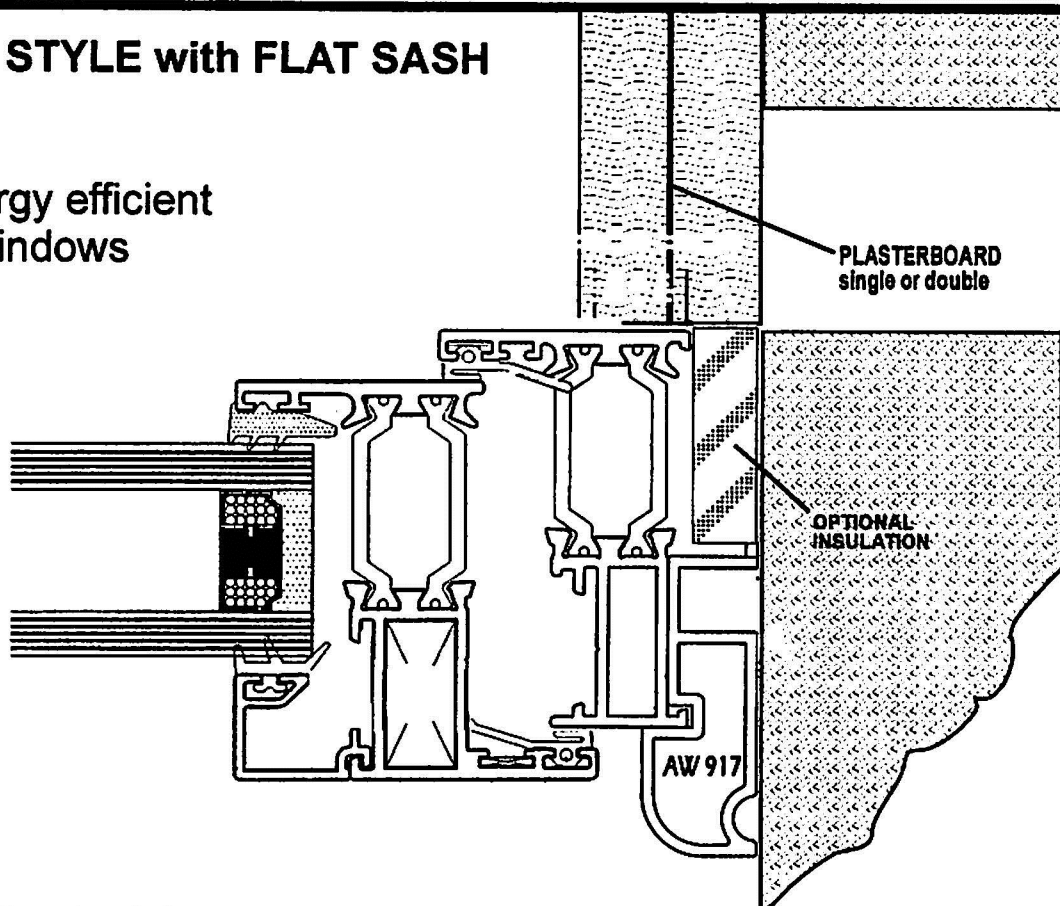

FLUSH STYLE with OVOLO SASH

'A' rated energy efficient aluminium windows

RECESSED STYLE with FLAT SASH

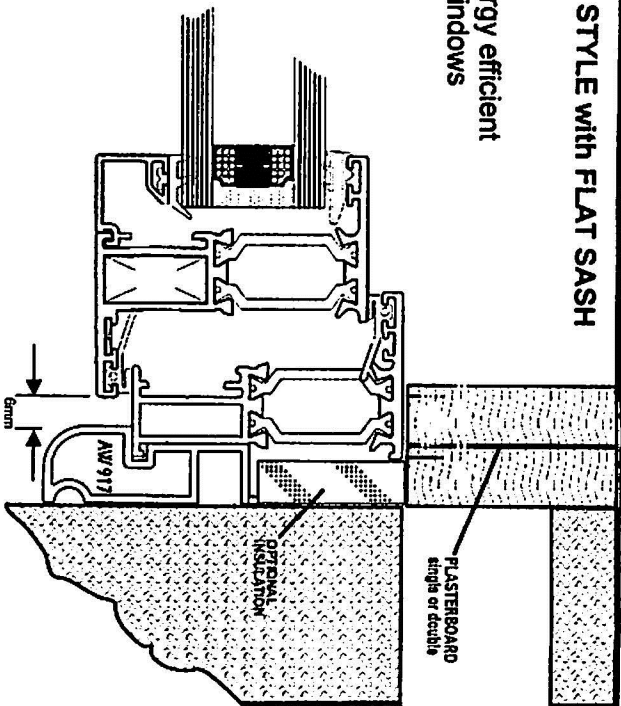

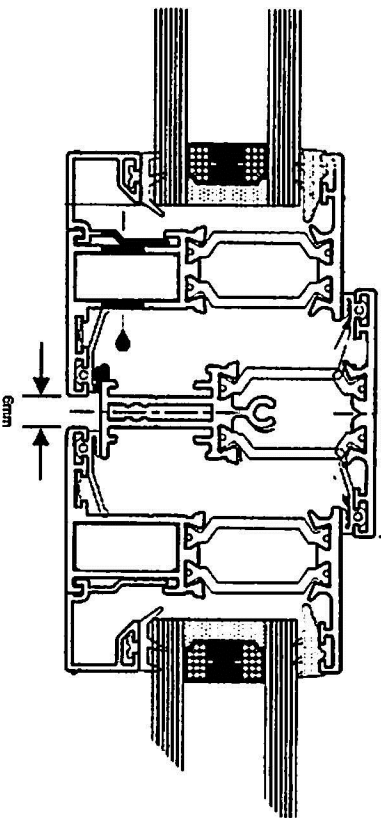

'A' rated energy efficient aluminium windows

**The AWS 917 can also be used on the head and cill
or the standard 25mm cill with or without AW 42 head extension**

RECESSED STYLE with FLAT SASH

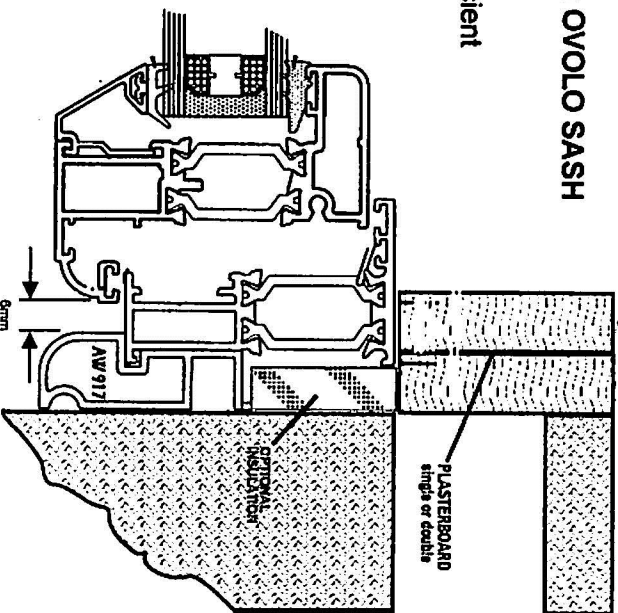

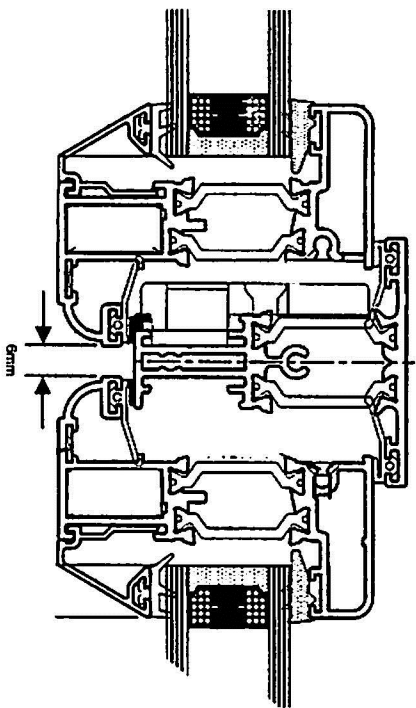

'A' rated energy efficient
aluminium windows

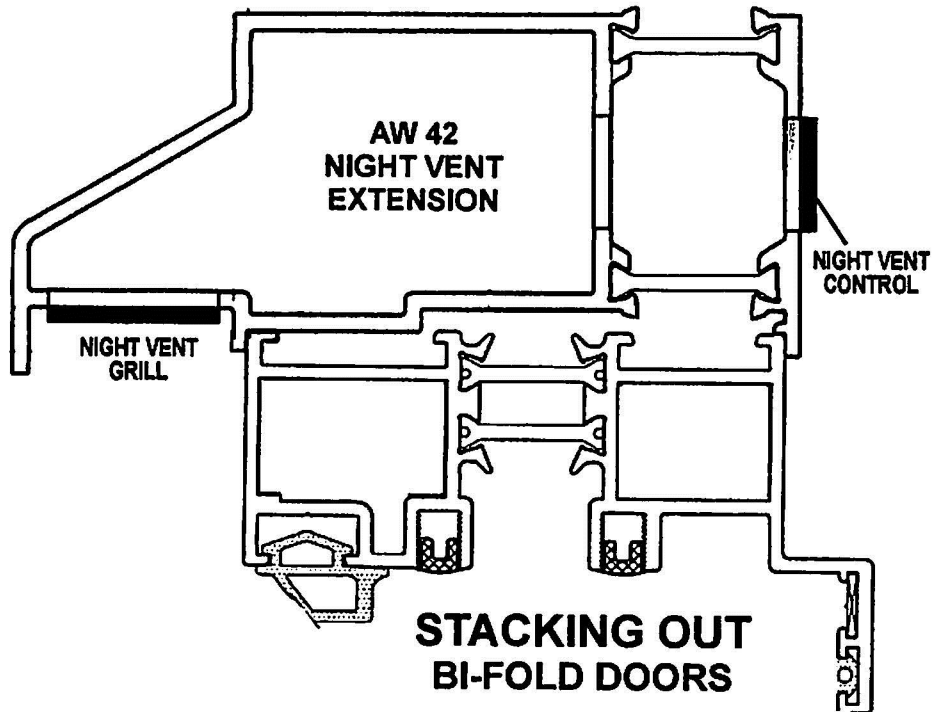

The AW 917 provides a 70mm outer frame which is ideal for replacement windows while retaining the slim appearance.

FLUSH STYLE with OVULO SASH

'A' rated energy efficient
aluminium windows

**AW 42 concealed 42mm *night vent head extension*
for Aluminium Bi-Fold Doors**

Concealed trickle ventilation with integrated head - no visible external night vents to spoil the appearance of slim aluminium windows and bi-fold doors. Bi-fold doors have a slim frame to frame size of 132mm & high security locking with high performance double glazing (as specified for 'A' rated windows).
